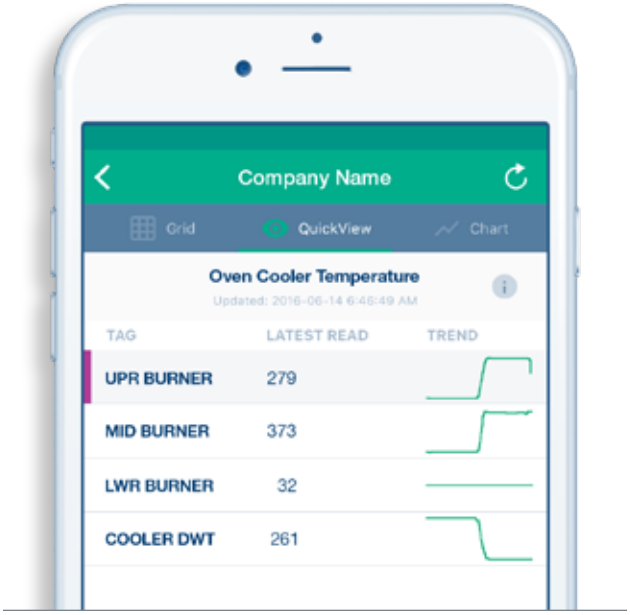
OPTEL™
Traceability technologies for a better world

Certified B Corporation

PRODUCTION EFFICIENCY TOOL



HELPING YOU ACHIEVE OPERATIONAL EXCELLENCE

OPTEL'S new **Production Efficiency Tool** – a cloud platform for collecting, storing and visualizing production efficiency across the company. Your manufacturing operations can now be monitored with real-time data that will help you achieve overall equipment effectiveness.

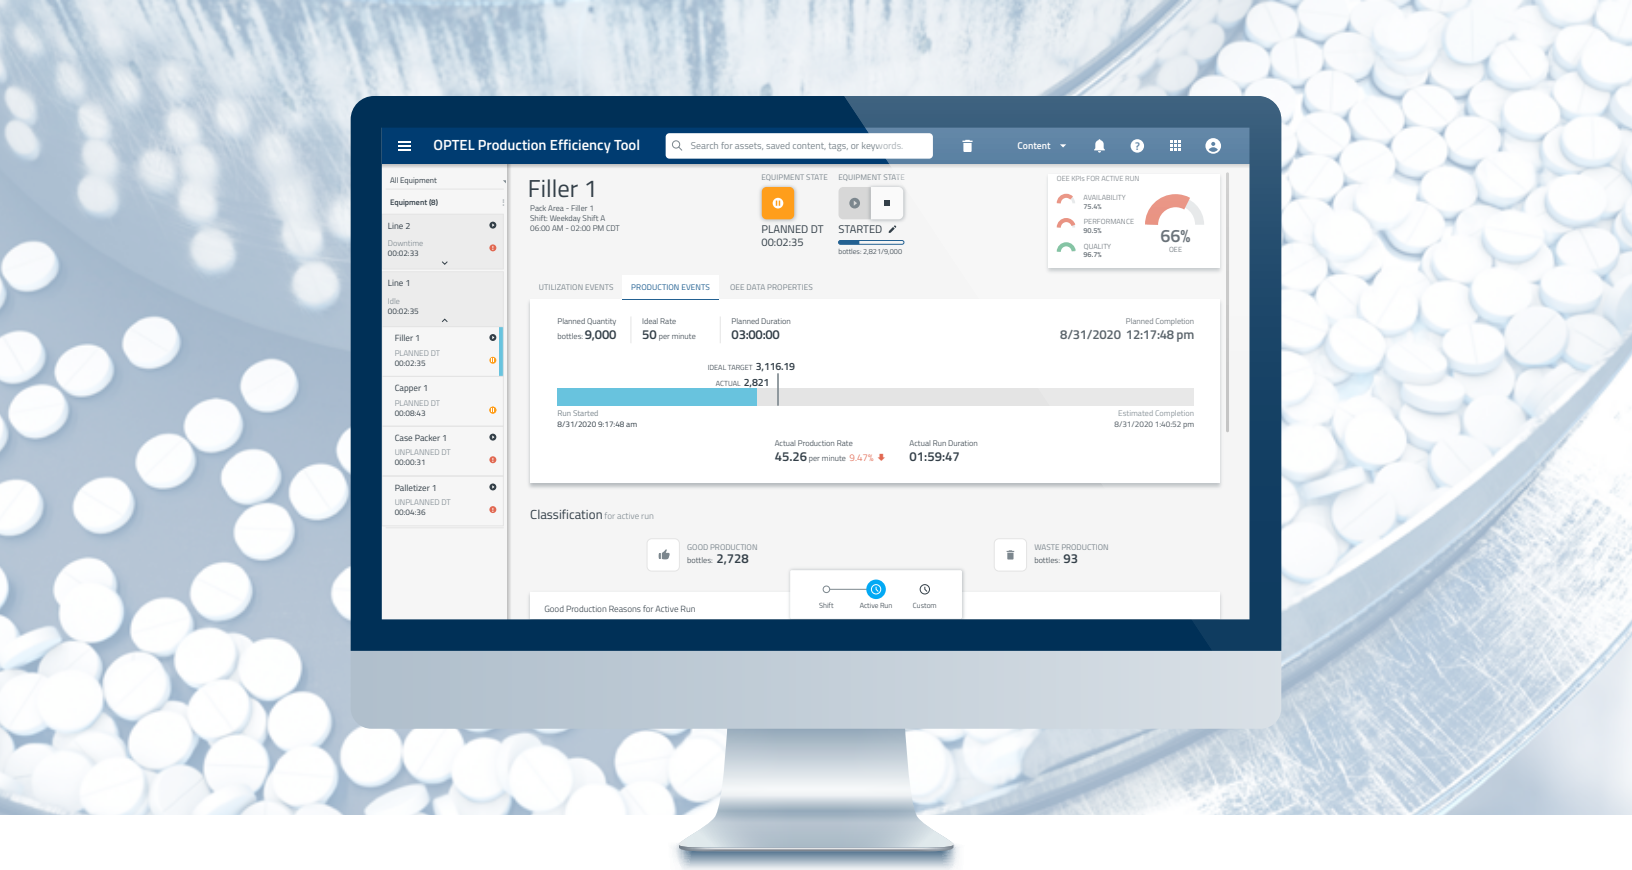
HOW TO IMPROVE YOUR PRODUCTION EFFICIENCY

- Optimize production across MES solutions: Unify data and real-time manufacturing information across the plant to enable process optimization and drive operational efficiency.
- Maximize existing equipment and leverage cloud and Internet of Things (IoT) technologies to deliver an always-up-to-date view of critical systems.
- Build a repeatable, global model that enables remote monitoring and optimization of procurement in the field; enable remote diagnostics of procurement problems; and implement a transparent solution to report on contractual obligations related to procurement efficiency.
- Gain access to critical information that is locked away in the control room; remotely provide visibility over plant performance – particularly during the nightshift when the plant is unstaffed – to determine if onsite intervention is required.
- Implement a mobile process management system to ensure the safety of the product produced every day; enable field operators to access critical data via mobile devices for immediate, onsite decision-making.

WHY YOU NEED OPTEL'S PRODUCTION EFFICIENCY TOOL

- Access personalized performance data
- Remotely monitor geographically dispersed assets
- Securely and cost-effectively access industrial data outside the control network
- Leverage existing smart sensors, such as IoT devices and automation systems, and make the data accessible
- Obtain a single view of the operational performance from multiple systems or devices
- Automatically retrieve data at a set frequency
- Benefit from a user-friendly information management tool with rapid time to value
- Connect with multiple systems: Android and iOS compatible, powered by the Aveva platform



OPTEL'S CUSTOMIZABLE AND SCALABLE OEE TOOL CAN BE TAILORED TO YOUR SPECIFIC NEEDS

FLEXIBLE PLATFORM

The platform can be configured to work with your existing systems and allows you to expand your datasets at any time.

ADVANCED REPORTING

Equipped with advanced reporting tools, OPTEL's Production Efficiency Tool is designed to help improve all your business operations.

These tools allow you to quickly identify and report on performance management. We provide the most relevant data in a simple, easy-to-use dashboard, providing real-time insights designed to support your specific business needs.
