### **BLISTERSAFE**<sup>™</sup>

VERIFICATION OF TABLETS AND CAPSULES ON ANY FORMING MATERIAL USED ON BLISTER PACKAGING LINES

OPTEL's **BlisterSafe™** provides precise verification of tablets and capsules on any forming material used on blister packaging lines and increases your overall line efficiency through a reduction of downtimes, false rejects and rework. BlisterSafe™ also increases line accuracy and quality assurance to help avoid costly recalls.

OPTEL's **BlisterSafe™** detects colored tablets and capsules even in similarly colored blisters. It is able to inspect multiple configurations, including white tablets on a white background. Our **BlisterSafe™** also has advanced software technology capable of handling all cutting matrices and blister tracking.

#### **KEY FEATURES**

- Unique illumination technology
- 1,000 blister packs per minute
- Precise color and shape verification
- Broken and missing tablet detection
- Misplaced or extra tablet detection
- Two-sided inspection with dual-color tablet correlation
