

# NO COMPLIANCE NO COFFEE!

Your EUDR journey in  
7 steps with Optchain

---

The iced coffee recipe for successful  
compliance, powered by the strongest  
platform on the market.

Act now and be compliant  
before **December 2025.**

BY OPTEL

# CUP

## The Solid Base (Kickoff & Foundations)

It all starts with a base:  
the regulatory context, defined roles,  
and first immersion into the platform.

- Understanding the EUDR implications  
(supported by our 35 years in  
compliance)
- Definition of responsibilities
- Initial configuration  
in Optchain

**Result:** the project team is  
aligned and ready to launch  
the process within a clear  
and shared framework.

1

2

## ESPRESSO

### The Core of the Project (Master data)

Espresso brings strength and richness: product, site, and partner data.

- Mapping of critical data
- Introduction to regulatory fields
- Possible synchronization with your ERP
- Training on data management

**Result:** your master data is reliable, structured, and ready to support EUDR traceability, with native interoperability with your existing systems and automated identification of EUDR products.

# MILK

## Connecting Stakeholders (Batches)

Milk softens and binds the elements:  
like the relationship between items  
and suppliers.

- Creation of batch-product relationships
- First supplier data requests
- Campaign launches
- Expert support for rapid supplier integration

**Result:** suppliers are  
activated and integrated  
into an interoperable data  
collection dynamic.

3

4

## SYRUP

### The Personalized Touch (Batch Declarations)

Espresso brings strength and richness: product, site, and partner data.

- Supplier training
- Declarations and validation of EUDR data
- Traceability control
- Automated risk assessment of countries, plots, and partners

**Result:** your master data is reliable, structured, and ready to support EUDR traceability, with native interoperability with your existing systems and automated identification of EUDR products.

## BLEND

### Smart Coordination (PO & Campaigns)

Everything comes together harmoniously. Purchase orders are linked to the right batches.

- Tracking of active campaigns
- Management rules between campaigns and traceable flows
- PO ↔ declared batches link
- Automation of quality checks, filtering of risky batches

**Result:** all data flows are harmonized and automated for legal risk management and audit readiness.

5

## ICE Due Diligence Statement (DDS)

This is the peak of the process: the official declaration, ready to be submitted.

- Creation of DDS for compliant batches
- DDS structure and submission in the EUDR register
- Preparation for customs use or reporting

**Result:** you are able to produce and submit complete DDS in compliance with requirements.

6

## TOPPING

### Go-live & Support

Everything is ready: you can enjoy a perfectly traceable – and compliant – coffee.

- Completeness audit
- Launch of continuous compliance
- Implementation of the support model

**Result:** our organization is operational, autonomous, and sustainably compliant with the EUDR.
